

Software Developer

NetFort provides network traffic and security monitoring software for virtual and physical networks. Headquartered in Galway, NetFort was established in 2002. Its customers include domestic and international businesses throughout the UK, USA and EMEA, ranging from SMEs through to large enterprises with multiple locations. Its flagship product LANGuardian, is used in a wide range of industry sectors including financial services, high technology, utilities, local and national government, automotive, healthcare, sport, and education.

NetFort is now seeking a **Software Developer** to join their innovative and dynamic R&D team based in Galway.

Position Summary:

As an experienced Software Developer; you will be responsible for the development of new product features and initiatives, ongoing development and providing advanced product support, in addition to any associated projects. This position will report to the Director of Research and Development and will be required to work onsite in our Galway Office.

Required Skills:

- 3+ years solid C and/or Python development experience
- Excellent understanding of networking protocols TCP/IP, UDP, DNS and Operating System architecture concepts
- Exceptional troubleshooting and debugging skills

Knowledge and Abilities:

- Independent, energetic, and capable of driving for results
- Great communication, collaboration, and teamwork ethic
- Ability to record technical details efficiently and accurately
- Experience with analysing complex requirements
- Ability to effectively prioritise and execute tasks in a high-pressure environment
- Experience working both independently and in a team-oriented, global collaborative environment
- Ability to take ownership of technical issues, and work with our Support Team and customers to resolve advanced issues

Minimum Qualifications:

- Degree in Computer Science, Engineering or related courses
- Excellent written and verbal communication skills

If you want to join an existing Development team and enjoy an interesting and varied workload in a highly collaborative environment, then send your CV along with a cover letter outlining why you would make you a good fit for this position to: careers@netfort.com
